Data Investigation
(2)

PART 1: Write 3 statistical questions we can ask about the data collected:
1.
2.
3.

PART 2: For your assigned question from the Carousel Activity, report the frequency of responses given for each answer choice. Then, using the proportion of the frequency of response to the total \# of responses given, find the other equivalent forms of the proportion.

## EXAMPLE:

Question \#: 1
Total \# of Responses: 25

| CHOICE A |  |  |  | CHOICE B |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | Percent | Fraction | Ratio | Frequency | Percent | Fraction | Ratio |  |
| 2 | $8 \%$ | $2 / 25$ | $2: 25$ | 7 | $28 \%$ | $7 / 25$ | $7: 25$ |  |
| CHOICE C |  |  |  | CHOICE D |  |  |  |  |
| Frequency | Percent | Fraction | Ratio | Frequency | Percent | Fraction | Ratio |  |
| 13 | $52 \%$ | $13 / 25$ | $13: 25$ | 3 | $12 \%$ | $3 / 25$ | $3: 25$ |  |

PART 3: Using the posted summaries for each question, can you answer the 3 statistical questions you listed above?
1.
2.
3.

DIRECTIONS: Complete the Data Summary for your assigned question. Use the back of the page for your work. Write neatly because others will be using your results.
Question \#
Total \# of Responses:

## CHOICE A

| Frequency | Percent | Fraction | Ratio | Frequency | Percent | Fraction | Ratio |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |
| CHOICE C |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
| Frequency | Percent | Fraction | Ratio | Frequency | Percent | Fraction | Ratio |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

Think About It: After completing this carousel activity, how do you think other students would answer the questions? Would the results be the same, similar, or different? Why or why not?
