

Directions: In the table below, fill in the equations for the Area of a side (square), the Surface Area of a cube, and the Volume of a cube. Then, find the length of a side, area of a side, surface area, and volume for each of your scale models of the dice at $1 x, 4 x, 10 x$, and $40 x$. Work each problem out on the back of this sheet, and then record your answers in the chart. Don't forget to include unit of measure for each answer.

|  | Side | Area | Surface <br> Area | Volume |
| :---: | :---: | :---: | :---: | :---: |
| Formula |  |  |  |  |
| Cube at $\underline{\mathbf{1 x}}$ |  |  |  |  |
| Cube at $\underline{\mathbf{4 x}}$ |  |  |  |  |
| Cube at $\underline{\mathbf{1 0 x}}$ |  |  |  |  |
| Cube at $\underline{\mathbf{4 0 x}}$ |  |  |  |  |

- What does Figure Drawn to Scale mean?
